**PROVINCIAL ADMINISTRATION, EASTERN PROVINCE
REQUEST FOR EXPRESSION OF INTEREST
(CONSULTING SERVICES-FIRMS SELECTION)**

**CONSULTANCY FOR ENGAGING TECHNICAL SERVICE PROVIDERS TO IMPLEMENT THE
PRIVATE SECTOR AND MARKET-LED INTEGRATED NATURAL RESOURCES AND LAND USE
PLANNING FOR THE “ZAMBIA INTEGRATED FOREST LANDSCAPE PROJECT” IN EASTERN
PROVINCE OF ZAMBIA**

Project Name: ZAMBIA INTEGRATED FOREST LANDSCAPE PROJECT (ZIFLP)

Project No. P161490

Reference No. MNDP/ZIFLP/CS/011/2019

1.0 BACKGROUND

Zambia's natural resource base is under immense pressure from various development sectors, including mining, energy, infrastructure and agriculture. Some of the main drivers of deforestation emanate from these sectors. The mechanism for reducing deforestation and forest degradation (REDD+) presents an opportunity for Zambia to address deforestation in a comprehensive and integrated manner by involving identified sectors and key actors. As such, Zambia developed the National REDD+ Strategy focusing on tackling different drivers of deforestation in both the forestry and other identified key sectors in particular, agriculture, energy, mining and infrastructure. The Vision of this Strategy is to contribute to a prosperous climate change resilient economy by 2030, anchored upon sustainable management and utilization of the nation's natural resources towards improved livelihoods.

The Project now invites suitably qualified TSPs including private sector and Non-Governmental Organizations (NGOs) to lead the implementation of activities as described under the scope of activities in project priority landscapes in the Eastern Province. TSPs can express interests as individual entities or as a consortium to deliver on the scope of this consultancy in its entirety in either of one or both landscapes in Eastern Province.

2.0 OBJECTIVE

The TSPs will support/facilitate planning and implementation of integrated land use and resource management that meet the climate resilience/mitigation and livelihoods objectives of rural households in the Eastern Province for the selected landscapes. This will assist in meeting ZIFLP's goal of investing in low carbon development initiatives that include district level integrated land use planning, participatory community land use planning, sustainable forest management, climate smart agriculture (CSA) and value chain development that address the underlying causes of deforestation and forest degradation.

3.0 SCOPE OF WORK

The broad set of activities to be supported by TSPs will include the following categories of activities; participatory land use planning where applicable, integrated land resource management, value chain development in agriculture, forestry and wildlife.

The TSPs will assist communities with preparation business plans and applications for sub grants through the ZIFLP to support the above livelihood activities, and support implementation of livelihoods activities to completion, including supervision of sub grants.

The TSPs are expected to manage the community sub-grant cycle including all Environmental and Social Safeguard requirements in collaboration with the District Multi-sectoral Teams, the ZIFLP-ESIO, and the relevant government agencies and departments.

Specific areas of TSPs engagement will include the following:

1. *Participatory Land Use Planning (PLUP)*; ZIFLP is currently conducting PLUP in select wards of Eastern Province. The TSPs will facilitate participatory land use planning process where this has not been conducted.
2. *Integrated land resource management*; The TSPs will identify priority conservation areas, and areas vulnerable to deforestation and degradation within the targeted landscapes where trends can be reversed through interventions related to land-based resource management including better land use practices. The identification of areas should take into consideration the interlinkages between various land uses and how interventions targeting resource management and land management could collectively help to achieve net positive impact of reducing deforestation and forest degradation.

4.0 SELECTION CRITERIA

Interested Consultants should provide information demonstrating that they have the required qualifications and relevant experience to perform the Services these include:

- (i) The TSP must show evidence of successful implementation of an integrated landscape, development, conservation or climate resilience project that utilized innovative tools and strategies to achieve both conservation and rural livelihood outcomes in the last five (5) years.
- (ii) A minimum of 10 years demonstrated experience of working with rural communities and forest-dependent communities in Zambia on community-based projects in sustainable land and resource management with demonstrated results
- (iii) Understanding and experience of REDD+ and GHG mitigation in landscape management would be highly desirable
- (iv) Experience of working with other national or international NGO/private sector led value chain, aggregation models, enhancement of market linkages and conservation centered livelihood development is a requirement.
- (v) Experience of working in the Eastern Province is desirable

Consultants may associate with other firms in the form of a joint venture or a sub consultancy to enhance their qualifications.

The attention of interested Consultants is drawn to paragraph 1.9 of the World Bank's Guidelines: Selection and Employment of Consultants by World Bank Borrowers (January 2011 revised July 1, 2014), setting forth the World Bank's policy on conflict of interest.

A consultant will be selected in accordance with the Consultant's Qualifications Selection Method (CQS) set out in the World Bank's [***Guidelines: Selection and Employment of Consultants by World Bank Borrowers***](#) (January 2011 revised July 1, 2014).
